

Maxwell Alvord

Full Stack Developer

Statement

I'm an ambitious developer looking to be part of a support system and prove their impact. I feel inspired when I am able to collaborate with others as well as hear customer feedback to be able to improve and dissect my work.

Projects

- [MERN-Finance](#) - MongoDB, Express, REACT, Node.js, Typescript, Vite
 - This project, named ECOM-VISION, takes the MERN tech stack and typescript to create a financial dashboard. Recharts is the component library used to visualize the data. This application uses DRY Solutions and utilizes modern design patterns.
- [MERN Web App \(The Society \)](#) - MongoDB, Express, REACT, Node.js
 - The Society is a project to practice the MERN Techstack and create a usable social media application. Site allows for local images to be posted and users can "friend" other users.

Education

- 2022 • Epicodus
 - Certificate in web and mobile development*
 - Completed 27 week full time program.
 - Built 75+ projects with C#, REACT, JavaScript, HTML, CSS as well as the skills listed below.
 - Explicit dedication to pair programming and working collaboratively in group projects.

Experience

Oct. 2022 - March 2023 -- Opine School

Full Stack developer

- Regular reviewing of peer merge requests before senior developer review for production.
 - Self delegates tasks off companies 3rd party project management system, ClickUp.
 - Navigate through React app Codebase to make updates and discover solutions to tasked areas.
 - Manipulate Cloud Firestore database for QA testing the staging site.
-
