

Maxwell Alvord

Junior Full Stack Developer

Statement

Ambitious junior developer curious to break and dissect projects. I feel inspired when I am able to collaborate with others as well as hear customer feedback to be able to improve my work.

Projects

- [Joke Book Chrome Extension](#) -

Javascript, HTML, CSS

- This is the outcome of my Team Week project that used APIs to allow the user to receive jokes as well as quotes with the click of a button, this extension is currently available at the Chrome store.

- [Inventory-Tracker-React](#) - REACT, JavaScript, HTML, CSS

- This is a solo project I was tasked to create in a day to demonstrate my ability to manipulate state as well as keep track of a product inventory. Functionality is completed without useHooks.

Education

2022 • Epicodus

Certificate in web and mobile development

- Completed 27 week full time program.
- Built 75+ projects with C#, REACT, JavaScript, HTML, CSS as well as the skills listed below.
- Explicit dedication to pair programming and working collaboratively in group projects.

Experience

Oct. 2022 - Present -- Opine School

Full Stack developer internship

- Regular reviewing of peer merge requests before senior developer review for production.
- Self delegates tasks off companies 3rd party project management system, ClickUp.
- Navigate through React app Codebase to make updates and discover solutions to tasked areas.
- Manipulate Cloud Firestore database for QA testing the staging site.
