I'm a full-stack developer who genuinely enjoys the process of building. Taking a goal, breaking it into pieces, and seeing everything click together is what keeps me motivated. I lean toward back-end work and do my best when pointed in a direction and given room to run. Over the past 2.5 years I've worked across product development and systems engineering, giving me a grounded understanding of how software actually operates under the hood. I pick up new tools and stacks quickly, having moved between Firebase, Vercel, SQL Server, and NeonDB across various projects. That adaptability is something I bring wherever I land.

EXPERIENCE

Systems Engineer — New West Technologies

Aug 2023 – Jan 2026

Portland, OR · Hybrid

- Managed SQL databases for clients via SQL Server Management Studio — creation, updates, backups, and migrations.
- Built custom modules using in-house Modern Suite software and maintained RMH POS systems.
- Set up and smoke-tested D365 Commerce Scale Units with in-house payment processing software.
- Used Jira and YouTrack for Agile task tracking and billing.
- Led documentation efforts for payment connectors and D365 lab setup as the company scaled into the Enterprise space.

Full Stack Developer — Opine

Oct 2022 – Mar 2023

Remote · Contract

- Reviewed peer merge requests prior to senior developer review for production deployment.
- Self-delegated tasks from ClickUp project management system.
- Navigated React codebase to implement updates and resolve issues.
- Manipulated Cloud Firestore database for QA testing on staging environment.

PROJECTS

SKILLS

Languages

JavaScript, TypeScript, C#, Golang, HTML/CSS, SQL

Frameworks & Libraries

React, Next.js, Node.js, Express, ASP.NET MVC, Material-UI, TailwindCSS, Bootstrap, jQuery, Unity/C#

Databases & Cloud

MongoDB, MySQL, NeonDB (Postgres), Cloud Firestore, Firebase, Vercel, SQL Server

Tools & Infrastructure

Git, Jira, YouTrack, ClickUp, Postman, Webpack, ESLint, Jest/TDD, Selenium, D365 CSU, RMH POS, Docker, Linux, Proxmox VE, pfSense, Networking/VLANs

EDUCATION

Epicodus

Certificate in Web & Mobile Development

- Completed 27-week full-time program with 1,000+ hours of classroom and internship development work.
- Built 75+ projects across C#, React, JavaScript, HTML, and CSS.
- Strong focus on pair programming and collaborative group projects.

Money-Manager — NeonDB, Next.js, React, Vercel, TailwindCSS

A full-featured personal budgeting tool with live data tracking and financial insights. Built with Next.js and deployed on Vercel, backed by a NeonDB (serverless Postgres) database. Live: MoneyManager.live

Ascoé — iOS App & Web

A cross-gender Q&A platform where men and women anonymously ask and curate honest answers. iOS app available on TestFlight. TestFlight: [Join beta](#) · Live: ascoe.space
